1. datasette-cluster-map 0.19
Source: Simon Willison’s Weblog | Published: 2026-11-13T23:02:45+00:00
Link: https://simonwillison.net/2026/Nov/13/datasette-cluster-map/
Release: datasette-cluster-map 0.19 One of the oldest Datasette plugins, and still one of my favorites. It now works with Datasette 1.0a42, and depends on the new datasette-leaflet to ensure OpenStreetMap tiles are requested with a referrer header. Here’s a map of power plants owned by California’s PG&E , also demonstrating Datasette’s recently redesigned facets : Tags: datasette , geospatial , openstreetmap

2. datasette-leaflet 0.3
Source: Simon Willison’s Weblog | Published: 2026-11-13T22:30:54+00:00
Link: https://simonwillison.net/2026/Nov/13/datasette-leaflet/
Release: datasette-leaflet 0.3 OpenStreetMap have a very reasonable policy that hits to their hosted tile server should send a referrer header . Datasette table pages used the Referrer-Policy: no-referrer HTTP header, causing plugins that loaded tiles from OpenStreetMap to violate that policy. datasette-leaflet is the plugin that loads a bundled Leaflet so other Datasette plugins can depend on it. It now sets the referrer policy on the tile requests themselves to strict-origin-when-cross-origin , passing the host but not the full path to the page. Tags: leaflet , datasette , openstreetmap

3. Terry Pratchett’s Study
Source: Simon Willison’s Weblog | Published: 2026-11-07T19:34:24+00:00
Link: https://simonwillison.net/2026/Nov/7/hn-50407316/
My comment on Terry Pratchett’s Study ? Hacker News. Terry Pratchett once wrote about the concept of "horizontal wealth". Vertical wealth is where you spend money on rich people stuff - yachts and suchlike. Horizontal wealth is where you spend more money on the things you liked before you got rich: https://chibuikeani.blogspot.com/2017/02/the-price-of-happin... But horizontal wealth means not letting your increased income dictate your tastes. You like books and now you have money? Buy more books! Change those catenary bookshelves for good hardwood ones! In my case, build a library extension to your office. And, of course, you buy what will be useful for that most wonderful of pursuits, blind research, which is research without direction for the sheer joy of it. (Original source is his book A Slip of the Keyboard - this linked blog post quotes that bit.) Tags: hacker-news , terry-pratchett

4. Andrew Sharp: ?Jensen Huang Was Always Going to Lose?
Source: Daring Fireball | Published: 2026-11-13T20:01:25Z
Link: https://sharptext.net/2026/jensen-huang-was-always-going-to-lose/
Andrew Sharp, in an excellent column at Sharp Text: I have a variety of thoughts after spending the past several days reading and recording podcasts about these (figurative and literal) affairs, but let me express one unpopular sentiment at the outset: what happened to Jensen Huang this week is tragic and depressing. I have a disease that makes me sympathetic to almost anyone who ends up on the wrong end of viral outrage and panic, and unfortunately it?s flaring up again. Huang is one of the greatest CEOs in American history. He?s still hyper competent, he?s been incredibly important to the growth of the AI ecosystem, and frankly, he?s among the most sane of the contemporary tech leaders we have on offer. His fall from grace has been not only stunning but seemingly coordinated. It is sad . But it?s also funny . Many tragedies are also hilarious . (That?s a key to Shakespeare?s enduring fame ? his tragedies had funny scenes and his comedies had painful themes .) But I think it?s now a very open question whether Jensen Huang was even a vaguely responsible CEO, let alone ?one of the greatest CEOs in American history?. What?s undisputed is that he?s one of the greatest technical innov...

5. Inside Jensen Huang?s Final Hours as the CEO of Nvidia

Drake Bennett and Ian King, reporting for Bloomberg (gift link): At the end, Jensen Huang looked broken and shattered, his legendary energy depleted. After weeks spent denying the allegations of infidelity and fighting to remain in his job as Nvidia Corp.?s chief executive officer, his surrender late Wednesday night was unconditional. Huang?s usual take-charge demeanor had evaporated, according to a person familiar with the situation, and he?d started using phrases like ?whatever? and ?I don?t care.? For the decades he spent building Nvidia into a multitrillion-dollar AI chip behemoth, Huang was famous for his attention to the tiniest of details, from chip architecture to the compensation packages of even the most junior employees at the company. Now, in the eyes of the people in the room, he had given up. According to people who?ve spoken with him in recent days, Huang has already taken a penitent turn, castigating himself as a ?piece of shit.? It really is sad. No joke here. It?s sad. ?

6. Microsoft, and Its Customers, Are Suffering a Global Cloud Outage
Source: Daring Fireball | Published: 2026-11-13T17:27:56Z
Link: https://arstechnica.com/tech-policy/2026/11/microsoft-blames-failed-server-health-checks-not-hackers-for-global-outage/
Ashley Belanger, Ars Technica: A global outage taking down a wide range of Microsoft 365 services remains ongoing Friday morning. The outage started midday Thursday, impacting users of Microsoft email, cloud, and AI services. Microsoft has documented the full list of services impacted by the error, while moving early Friday morning to protect customers around the world from losing emails during the extended disruptions. ?Recovery actions are ongoing,? the Microsoft 365 Status account confirmed on X. ?To help preserve delayed mail during this event, we?ve extended email timeout to 48 hours.? So it?s more like Microsoft 363 at this point. ?

7. How can I make it easier to use the helper class that lets me pass more than one parameter to co_await?

Link: https://devblogs.microsoft.com/oldnewthing/20261113-00/?p=112856/
Remove the need to have to type out the name of the helper. The post How can I make it easier to use the helper class that lets me pass more than one parameter to co_await ? appeared first on The Old New Thing .

8. Kepler and the dwarf
Source: John D. Cook | Published: Fri, 13 Nov 2026 14:54:38 +0000
Link: https://www.johndcook.com/blog/2026/11/13/kepler-and-the-dwarf/
Kepler?s third law A recent article from Smithsonian magazine says a new dwarf planet candidate is 46 times further from the sun as earth is, and it takes 281.1 years to orbit the sun. I did a back-of-the-envelope calculation and thought something was wrong. Kepler?s third law says T† = c a‡. Here T is the orbital [?] The post Kepler and the dwarf first appeared on John D. Cook .

9. Long permutations and long cycles
Source: John D. Cook | Published: Fri, 13 Nov 2026 11:59:31 +0000
Link: https://www.johndcook.com/blog/2026/11/13/long-cycles/
A permutation rearranges the elements of a list. The number of arrangements, say of a deck of cards, is finite, so eventually you have to arrive at an arrangement you?ve produced before, and history will repeat itself. Along the way, some cards may move in smaller cycles than others. Example For example, consider the permutation [?] The post Long permutations and long cycles first appeared on John D. Cook .

10. Gadget Review: Thermal Master P3 Lite - and Linux Instructions ?????
Source: Terence Eden?s Blog | Published: Fri, 13 Nov 2026 12:34:48 +0000
Link: https://shkspr.mobi/blog/2026/11/gadget-review-thermal-master-p3-lite-p2-max-and-linux-instructions/
The good folks at Thermal Master have sent me (yet another) thermal camera. The P3 Lite has a detachable macro lens. As well as being good for scanning your house for leaks and looking for wildlife, it can focus down on tiny electronic components. I've previously reviewed their P3 with adjustable macro focus, the chunky T2 Max, and the wildlife spotting DV2 - how does this compare? Like?

Today's links I told you so: Microsoft is too big to live. Hey look at this: Delights to delectate. Object permanence: Canada's corrupt copyright czar; Universal Music CEO v iPod owners; Berlusconi x neo-fascists; Balancing 3,118 coins on a dime; All for-profit healthcare is a problem. Upcoming appearances: Folkestone, Oxford, Sheffield, Virtual, Oxford, Santa Barbara, Montreal. Recent appearances: Where I've been. Latest books: You keep readin' em, I'll keep writin' 'em. Upcoming books: Like I said, I'll keep writin' 'em. Colophon: All the rest. I told you so (permalink) Here's the one weird trick that made it possible for monopolies to conquer the world: the antitrust bar changed the rules so that it was impossible to prove whether a company had formed an illegal monopoly, and then these rules meant that monopolies were almost never challenged, and what challenges did arise were usually unsuccessful, and even the successful challenges resulted in meaningless "penalties" that left monopolists unscathed. Every policy has three important dimensions: substance, scope and administrability: "Substance" is what the policy actually says. For example, the basic substance of copyright law...

15. So all software is free as in money now?
Source: matduggan.com | Published: Fri, 13 Nov 2026 14:16:16 GMT
Link: https://matduggan.com/so-all-software-is-free-as-in-money-now/
A few weeks ago I was up late in my kitchen. I've always been a bad sleeper, starting from when I was 10 and would spend whole nights reading books and watching the clock slowly wind it way to when I had to get up and go to
