1. Quoting Addy Osmani, Morgan Westlee Lunt, and Qing Wang
Source: Simon Willison’s Weblog | Published: 2026-10-16T22:06:37+00:00
Link: https://simonwillison.net/2026/Oct/16/code-review/
We think "did a human read the code?" is an imprecise proxy for "what could go wrong with this change, and which check?automated or human?is the right one to catch it?" Asking that question also changed when review happens. Before, review was a gate at the end of the road: write the code, open a PR, wait for your colleague. Now, review runs continuously, more like spellcheck while you write. Most changes have been reviewed and fixed by Claude at least once before a human is asked to look. This catches most routine mistakes, and saves team attention for higher-level questions and scrutiny. ? Addy Osmani, Morgan Westlee Lunt, and Qing Wang , How the Claude Code team does code review Tags: anthropic , claude , ai , claude-code , llms , addy-osmani , coding-agents , generative-ai , agentic-engineering , code-review

2. LaTeX renderer
Source: Simon Willison’s Weblog | Published: 2026-10-15T02:07:28+00:00
Link: https://simonwillison.net/2026/Oct/15/latex/
Tool: LaTeX renderer Inspired by Paul Ford and Aboard Foundary’s new web app Tiny Little Office , which provides a suite of web app content editors (a Word Processor, Outliner, Presentation Builder, Spreadsheet, Calculator, Drawing Tool, Diagram Maker, Animator, Calendar, and Trip Planner). Tiny Little Office’s signature trick is to store all of the document data in the #fragment section of the URL, so every document created using it becomes a bookmarkable and shareable link. It also has an llms.txt file telling agents how to construct URLs that will render as documents. Claude used that file to generate this link to a deck that explains how the URL format works: Tiny Little Office inspired me to have Claude Code (Opus 5.5 Extra) build a similar tool that works with LaTeX. Here’s the sequence of prompts I used: I want a tool where you can link to it with a fragment hash #code-here and it treats that code as LaTeX and renders it really effectively. It should also support a prefix which means the latex is compressed with a custom compression dictionary optimized for latex. Use the best available latex render library from a CDN (consider WebAssembly too). If loaded without a fragment...

3. Profiling web-edit with Python 3.15: flame graphs and source heatmaps
Source: Simon Willison’s Weblog | Published: 2026-10-12T16:58:00+00:00
Link: https://simonwillison.net/2026/Oct/12/python-3-15-web-edit-profiling/
Research: Profiling web-edit with Python 3.15: flame graphs and source heatmaps I put the new Python 3.15 profiler through its paces by having GPT-6 Astra Extra High in Codex run it against my new web-edit app : I need a Python 3.15 flame graph and heatmap demo of the "web-edit" app from PyPI - research first then make me those demos Here’s the resulting example flame graph and heatmap . 4. The Late Charlie Munger on Elon Musk and Tesla
Source: Daring Fireball | Published: 2026-10-17T01:22:34Z
Link: https://www.cnbc.com/make-it/2020/02/14/charlie-munger-shares-opinion-of-tesla-ceo-elon-musk.html
Re: my post today on the still-vaporware Tesla Roadster and Benedict Evans?s maxim that ?Elon Musk is a bullshitter who delivers?, a reader sent me this YouTube short of Charlie Munger?s answer to a question at Berkshire Hathaway?s 2020 shareholder meeting regarding Tesla?s volatility and Musk?s self-promotion. Munger said: My thoughts are two. I would never buy it, and I would never sell it short. [Audience laughs.] I have a third comment. There was a man out in Los Angeles for years named Howard Ahmanson. He once said something that I?ve taken to my heart: ?Never underestimate the man who overestimates himself.? I think Elon Musk is peculiar and he may overestimate himself, but he may not be wrong all the time. ?

5. Apple: ?Strengthening App Review Guidelines Against Nonconsensual Intimate Imagery and Bait-And-Switch Apps?
Source: Daring Fireball | Published: 2026-10-17T01:00:00Z
Link: https://developer.apple.com/news/?id=vvzx6cul
Apple Developer News: As outlined in our App Review Guidelines, pornographic material has long been prohibited on the App Store ? this includes apps that generate nudity or sexually explicit imagery, such as ?nudification? apps that create sexually explicit images of real individuals without their consent. Apps that host user-generated content are required to filter objectionable material, give users a way to report offensive content, and let users block abusive accounts. Apps containing hidden or undocumented features are also prohibited on the App Store, including apps that misrepresent their purpose during review and only reveal harmful capabilities ? such as ?nudification? ? after approval, a tactic commonly known as bait-and-switch. Their post includes the specific changes to the guidelines. Let?s hope the guideline changes are accompanied by better enforcement. Of course, it?s worth noting that the best known perpetrator of AI-generated non-consensual nudification is X, which (checks notes) is where Apple executives do all their social media posting , and which, yes, I argue once again marks the spot in the zeitgeist. The zeitgeist is not clean. ?

6. Apple TV Started at $69 in 2015
Source: Daring Fireball | Published: 2026-10-17T00:37:01Z
Link: https://www.macrumors.com/2015/03/09/tim-cook-apple-tv-now-costs-69/
Joe Rossignol, reporting for MacRumors back on 9 March 2015: Apple CEO Tim Cook on Monday at the ?Spring Forward? media event in San Francisco announced that Apple TV will now cost $69, discounted from its regular price of $99. The new price for the set-top box arrives on the heels of the announcement of HBO Now for Apple TV . The new price appears to apply to the third-generation Apple TV, as the company did not announce a new set-top box on stage at the Yerba Buena Center this afternoon. Basic Apple Guy posted a short clip of Tim Cook, on stage, announcing the price reduction. Cook said: And it?s got a very attractive entry level price of $99. But today, we would like to make it even more accessible for more people so they can take advantage of this great new content. So we are lowering the price today to $69. The audience greeted this with whoops and cheers. (This, despite it being a smaller media event ? Apple always packs the front of the house with employee ringers. Whoops and cheers are one of the things Apple is missing out on with their post-COVID pre-filmed keynotes.) Apple continued selling the 3rd-gen Apple TV (not to be confused with ?Apple TV 4K?, which restarted the...

7. AI is driving a boom in modestly successful software projects
Source: seangoedecke.com RSS feed | Published: Fri, 16 Oct 2026 00:00:00 GMT
Link: https://seangoedecke.com/ai-is-driving-a-boom-in-modestly-successful-software/
If AI is so great, why aren?t we seeing an explosion of new, amazing software products? If anyone can turn their idea into working software with coding agents, where is all that software ? People have been asking this question for years. As far as I can tell, the answer is that it?s spread out over a lot of modestly successful projects: Somewhere between 2x and 20x new software is being created, depending on where you look There?s no real growth in massively successful software projects (not counting AI tools) There is around 2x growth in modestly successful software projects Where all the new software is I picked 1 around twenty separate sources ? software marketplaces, plugin registries, modding platforms, etc ? which expose installation counts. I then compared the number 2 of successful software projects between 2022-24 and 2025-26: i.e. before and after agentic coding hit the mainstream in mid-2025. There?s a clear jump in modestly (not wildly) successful projects. For instance, the NVDA screen-reader addons directory had a bit over twice as many new addons with more than a thousand downloads (though no change in addons with more than ten thousand). The HACS open-source home a...

11. Book Review: Africa Is Not A Country - Breaking Stereotypes of Modern Africa by Dipo Faloyin ?????
Source: Terence Eden?s Blog | Published: Fri, 16 Oct 2026 11:34:14 +0000
Link: https://shkspr.mobi/blog/2026/10/book-review-africa-is-not-a-country-breaking-stereotypes-of-modern-africa-by-dipo-faloyin/
It’s hard to craft a book with so much righteous indignation - let alone make it funny, accessible, and informative. Nevertheless, Dipo Faloyin has succeeded in writing a spectacular takedown of the myths which are often perpetrated about Africa. It starts in the best way possible: [Insert generic African proverb here. Ideally an allegory about a wise monkey and his interaction with a tree,?
