1. eMudhra Intermediate CA Compromise
Source: Simon Willison’s Weblog | Published: 2026-10-20T23:50:25+00:00
Link: https://simonwillison.net/2026/Oct/20/emudhra-certificates/
eMudhra Intermediate CA Compromise This is very, very bad news: The private keys of eight eMudhra intermediate CA certificates have been compromised. They chain to roots trusted by the Mozilla, Microsoft, Apple and Chrome root programs and by many downstream trust stores. Any software that bundles a list of trusted certificates needs to be updated. This site is tracking software updates via this GitHub repository - Linux distros need to update their ca-certificates packages. In Python world uv 0.13.4 and pip 26.2.2 and certifi 2026.10.19 have been released with upgraded certificate lists. Tags: encryption , https , pip , python , security , uv

2. Battle Drones - a vibe coded RTS with audio-based multiplayer
Source: Simon Willison’s Weblog | Published: 2026-10-20T19:34:19+00:00
Link: https://simonwillison.net/2026/Oct/20/battledrones/
My latest vibe coded game experiment is a Command & Conquer style RTS (Real Time Strategy) game called Battle Drones (play it here). Unlike my previous experiments , this one is actually fun to play . I’m somewhat embarrassed to admit that I got there by telling Claude to "Make it a LOT more fun". It also supports multiplayer between nearby devices using audio to synchronize game state! Here’s what I’ve built so far, and some of the things I learned along the way. Battle Drones How I built this v1: the initial prototype v2: full sprites v3: varied terrain v4: the fun update v5: Battle Drones goes 3D v8: Archipelago v10: Goliath, and agent battles Agent battles v11: Random Maps v12: Multiplayer via sound Some thoughts Update: Online multiplayer support Battle Drones My initial goal was to build an RTS game I could play on my phone, in the style of Command & Conquer . I have fond memories of the 1995 original (I liked Red Alert too) and wanted to recapture a little bit of the magic. After 12 major iterations (and 321 commits by coding agents, mainly Claude Code) I now have a browser-based game that works on mobile and desktop, has multiple play modes, several maps (including a ran...

4. ? Estimated Arrival Dates for DF Readers? Pre-Ordered iPhone Duos
Source: Daring Fireball | Published: 2026-10-19T22:04:04Z
Link: https://daringfireball.net/2026/10/estimated_arrival_dates_for_preordered_iphone_duos
No one should mistake my audience as representative of the general public in any poll, but I bet my audience is at least ballpark representative of the general public when it comes to something like pre-ordering, at the crack of dawn, a new iPhone form factor that costs $2000 to $3200.

5. Netflix Shitcanned Film Chief Dan Lin Too
Source: Daring Fireball | Published: 2026-10-19T21:15:57Z
Link: https://deadline.com/2026/10/netflix-dan-lin-out-1237167562/
Anthony D?Alessandro, reporting for Deadline: Dan Lin is out as film boss at Netflix in a move that has been largely speculated for weeks. Insiders at the streamer have denied that Lin and even Bela Bajaria were on the chopping block, but here we are. Lin is meeting with his feature staff Monday morning for a post-mortem after the news. Per sources close to the situation, a successor to Lin won?t be named until the arrival of Peter Rice, who is taking over Netflix?s Chief Content Officer role from Bajaria. Netflix?s movies are worse than their series, which also mostly stink . (As opposed to Apple TV, which somehow makes terrible movies while making

the best series in the business.) Mike Isaac, on X : it has long been understood that, qualitatively, a ?netflix movie? exists in the liminal space between theatrical release and Lifetime production with some notable exceptions, even the biggest budget productions feel cheap, strange and worst of all, unmemorable ?

6. Book Review: Quackery - A Brief History of the Worst Ways to Cure Everything by Lydia Kang ?????
Source: Terence Eden?s Blog | Published: Tue, 20 Oct 2026 11:34:35 +0000
Link: https://shkspr.mobi/blog/2026/10/book-review-quackery-a-brief-history-of-the-worst-ways-to-cure-everything-by-lydia-kang/
This is a charming and funny book all about the various ways humans have promoted fake medical cures in exchange for money. Despite the grim (and occasionally distressing) subject matter, the tone remains light and poppy throughout. There are lots of snarky asides (especially about the fake medical practitioners) and a real appreciation for the bizarre. It’s fun the whole way through, although ?

7. Pluralistic: The death of history’s most successful publisher (20 Oct 2026)
Source: Pluralistic: Daily links from Cory Doctorow | Published: Tue, 20 Oct 2026 17:24:41 +0000

Today’s links The death of history’s most successful publisher: Google has a scorching case of "main character syndrome." Hey look at this: Delights to delectate. Object permanence: Civil War x 4,400 ceramic cats; Okaysellers; Frankenstein hat; Clockwork Fagin; Tracking trackers; "Fever Beach." Upcoming appearances: Victoria, Vancouver, Ottawa, Vienna, Kilkenny, Couretnay, Vancouver, Oxford, Sheffield, Virtual, Oxford, Montreal. Recent appearances: Where I’ve been. Latest books: You keep readin’ em, I’ll keep writin’ ’em. Upcoming books: Like I said, I’ll keep writin’ ’em. Colophon: All the rest. The death of history’s most successful publisher (permalink) I published my first story in 1988, when I was 17 years old. Today, at 55, I’ve published more than 30 books, with three more coming in the next year or so. In the intervening years, I’ve spent a lot of time thinking and talking about publishing. I’ve had plenty of opportunity to reflect on publishing: I’ve been a bookseller and worked in libraries, I wrote a column for Publishers Weekly, self-published a few books of my own, published the first-ever book licensed under Creative Commons, and broke several Kickstarter records for...

Link: https://feed.tedium.co/link/15204/17501584/death-domains-commentary
A recent piece on ?forever domains? sparked bigger questions about permanence online: when domain owners die out, do we need new systems that don’t rely on domains at all?

10. NixOS Is Making Me Less Afraid
Source: Entropic Thoughts | Published: Tue, 20 Oct 2026 00:00:00 +0200
Link: https://entropicthoughts.com/nixos-is-making-me-less-afraid
Something funny happened a little while ago: I read about FreshRSS, and it sounded nice, so I installed it on a server and started using it . That would not have happened a year ago, but then again, a year ago I didn?t have any NixOS servers. For the past few years, my RSS feeds have lived locally on my phone only. There was a good idea behind that, but it never quite worked in practice. For one, many things are easier to read on a larger screen. But it was also

brittle to trust a phone app to manage the read/unread status of thousands of articles across a hundred feeds. What I really wanted was a server-side feed aggregator. This is software that runs on a server, manages RSS feeds, and then I can read the RSS feeds either through a web interface, or through client applications. I?ve wanted that for a while, but I?ve never taken the step, because it would be yet another side project to maintain the deployment of. But now, with some NixOS experience, adding a working FreshRSS configuration (including backups) took 9 lines of Nix code. That installation has just hands-off worked for the past few months. If or when that server breaks, I can spin up a new one running the exact same c...

11. How to install an app on your Commodore 64
Source: Anil Dash | Published: 2026-10-20T17:36:24Z
Link: https://anildash.com/2026/10/08/install-an-app-commodore-64/
It?s time to install an app! But here in 1986, we still call them ?programs,? not apps. So, you?ll want to set aside some time to get started installing a program. Since you have a Commodore 64, there are really only two options for getting new programs this month: COMPUTE!?s Gazette and RUN , and you have to hope that one of those magazines isn?t sold out at the book store. So let?s get going. Go To The App Book Store You will need to ask your mom if you can ride your bike to the mall. The dirt mall is closer, but the magazine stand at the dirt mall doesn?t carry any computer magazines, so you?ll need to take a longer ride to the good mall, where the book store actually has computer magazines. It?s a couple of miles to the mall, so usually you would have a friend come with you, but you called their house and nobody picked up, so today it?s a solo trip. Only one book store carries computer magazines at this mall; the other one only carries magazines about ?serious? topics, but they can order back issues of a magazine for you if you want, you just have to wait a few weeks and they?ll call you when it comes in. The guy at the book store doesn?t know the difference between the differ...

12. ClickHouse Will Let You Be Wrong at Scale
Source: matduggan.com | Published: Tue, 20 Oct 2026 14:01:12 GMT
Link: https://matduggan.com/clickhouse-will-let-you-be-wrong-at-scale/
So I’ve posted before how I think ClickHouse is great. Its columnar storage is fast, it has amazing compression. I won’t bore you with those details, you can see them all here: https://matduggan.com/clickhouse-is-winning-the-observability-wars/ However all technology is great
