1. Gemini Decisions API
Source: Simon Willison’s Weblog | Published: 2026-11-11T22:03:25+00:00
Link: https://simonwillison.net/2026/Nov/11/gemini-decisions-api/
Gemini Decisions API Google join Jev and OpenAI in the decision model category with "Gemini Decision 1". This new model API is almost identical to Jev: it supports the same three types of questions (yes/no, choice, and rubric-scoring) and even reuses Jev’s term "Noul" for a yes/no question. It’s priced the same as the GPT-6 Luna decision model: 10 cents per million input tokens, and output is free. Jev remains the cheapest of the three, at 4.2 cents per million. Jev is text (and JSON) only. OpenAI can handle text and images. Gemini Decision 1 is fully multi-model: it covers text, images, audio, video, and PDFs. I tested it against video by passing these questions to it along with my Yonkers stomping robot video file: dragon: Does this video have a dragon in it? robot: Does this video have a robot in it? france: Is this video set in France? usa: Is this video set in the USA? Jev and OpenAI both return 1.0 or 0.0 for yes/no questions, but Gemini insists on being a little less confident than that: { "dragon" : { "type" : " yes_no " , "probability" : 0.04976021841520312 }, "robot" : { "type" : " yes_no " , "probability" : 0.9234055387792485 }, "france" : { "type" : " yes_no " , "proba...

2. aws-emulator
Source: Simon Willison’s Weblog | Published: 2026-11-11T21:18:30+00:00
Link: https://simonwillison.net/2026/Nov/11/aws-emulator/
aws-emulator Finally, an official emulator from AWS to run tests against a local clone of their many different services without having to provision a paid API key to do so. It’s written in Rust by a huge swarm of agents - 29,684 commits in the first three weeks of the project. Swaminathan (Swami) Sivasubramanian wrote about how it came to be in a guest post on Werner Vogels’ blog. It currently requires Docker to run on macOS or Windows. I’m hoping they fix that in the future - it would be great if you could download a single binary and use that as part of a standard test suite in other languages and on other platforms. Browse tools.simonwillison.net by tag I’ve been wanting a better way to browse my collection of vibe-coded tools (244 and counting) for a while. I had a few Fable 5.2 credits left over before my weekly reset so I set it to work using tree-sitter to analyze the code for JavaScript APIs, libraries, and web API hosts used by each tool. The homepage now features tag clouds for browsing by each of those categories of tag: 5, AbortController 6, Blob URLs 38, BroadcastChannel 1, Built-in AI 1, Camera / microphone 9, Canvas 2D 44, Clipboard API 69, Compression Streams 3, createImageBitmap 2, crypto random values 4, DOMParser 8, Drag and drop 30, Dynamic import() 12, ES modules 92" src="https://static.simonwillison.net/static/2026/tools-tag-cloud.webp" /> Tags: javascript , tools , ai , generative-ai , llms , claude , vibe-coding

4. Semafor: ?Nvidia Board Preparing to Oust CEO Jensen Huang, Name Interim CEO?
Source: Daring Fireball | Published: 2026-11-12T04:59:59Z
Link: https://www.semafor.com/article/11/11/2026/nvidia-board-preparing-to-oust-ceo-huang-wsj
Rohan Goswami, Reed Albergotti, and Ashley Gold, reporting for Semafor at 10:27pm ET: Some members of Nvidia?s board favor appointing Chief Financial Officer Colette Kress as interim CEO at the beleaguered chipmaker if CEO and founder Jensen Huang is ousted, according to people familiar with the matter. Here?s Kress?s LinkedIn profile . Semafor earlier confirmed that Nvidia?s board is preparing to oust Huang as soon as Wednesday, after media reports detailed

that he had a second extramarital affair. The Nvidia board briefed the White House on its planned meeting, according to a senior administration official. Nvidia has tapped an outside search firm to find the company?s next CEO, Bloomberg reported. One person being considered for the top job is Apple hardware chief Johny Srouji, who was among the executives considered for Intel CEO in 2019, according to another person familiar with the matter. Kara Swisher spitballed Tim Cook as an idea, but that?s nonsense. If Cook wanted to be the CEO of a Fortune 2 company, he?d still be CEO at Apple. Apple despises Nvidia and Nvidia despises Apple. Cook may well be enjoying this fiasco, but only as entertainment drizzled with fresh farm-to-t...

5. Nvidia Working With Outside Firm to Identify CEO Candidates
Source: Daring Fireball | Published: 2026-11-12T03:57:43Z
Link: https://www.bloomberg.com/news/articles/2026-11-11/nvidia-working-with-outside-firm-to-identify-ceo-candidates
Nina Trentmann and Ian King, reporting tonight for Bloomberg: Nvidia Corp.?s board has been working with an outside firm to identify potential replacements for Chief Executive Officer Jensen Huang following reports of multiple extramarital affairs, including one with a woman who is reportedly suspected of spying for China, a person familiar with the situation said. The board is weighing the idea of naming a temporary chief while searching for a permanent one, the person said, asking not to be identified because the information isn?t public. Directors were meeting on Wednesday to discuss Huang?s fate, according to people familiar with the situation. The Wall Street Journal said earlier that the board was preparing to oust Huang, citing unidentified people familiar with the matter. Nvidia didn?t immediately respond to a request for comment. There?s no obvious internal candidate because Huang rejected any sort of succession planning within the company?s ranks. I don?t know who they could hire from outside with gravitas, expertise, and integrity who would want the job. It looks more and more like 20 percent of their sales have been illegally smuggled into China and Nvidia covered it u...

6. WSJ: ?Nvidia Is Preparing to Oust CEO Jensen Huang?
Source: Daring Fireball | Published: 2026-11-12T03:42:05Z
Link: https://www.wsj.com/business/nvidia-is-preparing-to-oust-nvidia-ceo-jensen-huang-30f421ad?st=S84MQZ
Robbie Whelan, Josh Dawsey, Amrith Ramkumar, reporting for The Wall Street Journal in the aftermath of the NYT?s scoop that Huang was having an affair with an Nvidia vice president too: Nvidia?s board is preparing to oust CEO Jensen Huang after he had two extramarital affairs, including one with a suspected Chinese spy and another with an employee. The board is planning to meet as soon as Wednesday to determine his future, people familiar with the matter said. His departure would bring down the curtain on an era during which he stoked the global artificial-intelligence boom and became a geopolitical star. It would leave one of the world?s most valuable companies in need of a new leader. The WSJ report was filed at 7p ET Wednesday, so presumably ?as soon as Wednesday? means tonight. I give it better than even odds that we wake up tomorrow and Huang is out. ?

7. Who Runs the Ransomware Group Qilin?
Source: Krebs on Security | Published: Wed, 11 Nov 2026 18:06:01 +0000
Link: https://krebsonsecurity.com/2026/11/who-runs-the-ransomware-group-qilin/
The cybercrime group Qilin has emerged as the world’s most active ransomware affiliate program, claiming at least 365 victim organizations in the past three months alone. But even top Russian hackers make operational security mistakes, and the administrator of Qilin has made a few key missteps over the last decade that all point to a 36-year-old man living in St. Petersburg, Russia.

8. I didn?t write a program with emoji, but I did use a control character
Source: The Old New Thing | Published: Wed, 11 Nov 2026 15:00:00 +0000

My program was a fairly simple one. The post I didn?t write a program with emoji, but I did use

a control character appeared first on The Old New Thing .

9. Why Am I So Tired If AI Is Doing All the Work?
Source: Terrible Software | Published: Wed, 11 Nov 2026 18:23:50 +0000
Link: https://terriblesoftware.org/2026/11/11/why-am-i-so-tired-if-ai-is-doing-all-the-work/
AI makes it easy to start more work. But reviewing it all still takes your time and attention. No wonder we?re so tired.

10. HowTo: Fix Eufy HomeBase 2 Storage Full Issues
Source: Terence Eden?s Blog | Published: Wed, 11 Nov 2026 12:34:05 +0000
Link: https://shkspr.mobi/blog/2026/11/howto-fix-eufy-homebase-2-storage-full-issues/
Quick Fix: Insert a USB memory stick, format it in the app, restart the Eufy HomeBase 2, format the internal memory, restart the hub. Background I’ve had the eufyCam system for over 6 years - which is pretty long-life for IoT devices. The cameras have worked pretty much flawlessly. Four years ago I added their Video Doorbell which has been similarly well behaved. But last night I went to?

11. This Week in Source Control: 11 November 2026
Source: Andrew Nesbitt | Published: 2026-11-11T10:00:00+00:00
Link: https://nesbitt.io/2026/11/11/this-week-in-source-control.html
This week?s version control and forge news, gathered from release feeds for source control clients and forges, the Lobsters vcs tag , Hacker News, and my boosts on Mastodon . Package management news is in the Saturday This Week in Package Management roundup. Scaling Inside GitHub?s new Git storage architecture (Karthik Raman and Brian Celenza, GitHub) describes Rubicon, the design announced at GitHub Universe. Packs go to Azure Blob Storage. References and the list of packs are stored in Ref-CAS, a replicated log service where each reference update is a compare-and-swap committed by a quorum, so a push waits only on other pushes to the same reference. In internal tests one repository accepted 7,200 pushes per second from 5,000 concurrent agents. Requests still arrive at Spokes, which routes each one to a small group of virtual replicas, disposable compute nodes whose local disk is a cache. A replica handling a write indexes the pack, uploads it to Blob Storage, then commits one Ref-CAS transaction. For reads it sends the version in its cache, and the reply includes references only if they have changed since that version. Two earlier prototypes stored reference state in blobs. The...

14. NYC?s venture capitalists need to love themselves
Source: Anil Dash | Published: 2026-11-12T04:24:15Z
Link: https://anildash.com/2026/11/03/nyc-venture-capitalists-love-themselves/
I really want a lot of venture capital investors to work on their self-esteem. After a few decades of supporting and mentoring New York City?s tech community, I hope I?m credible when I say I care a lot about how it thrives. So one of the most disappointing?and frankly surprising ?things I?ve seen lately is how many investors in the greatest city in the world have been lowering themselves, sucking up for approval from a cohort of Silicon Valley tycoons who hate our city, hate our values, and want us to fail. I?m furious because there are so many good people and good ideas here that deserve to thrive, and aren?t getting the chance. Why would anyone sit by while outsiders put our community down, only to let those same outsiders profit

off us when we succeed anyway? In fairness, I?m not talking about all of our city?s investors. Some are content to keep their heads down and hope the worst of the West Coast doesn?t notice them. But imagine if our other civic institutions worked this way: the Knicks timidly stepping onto the court and standing back while opponents charge the rim, or the Liberty letting the other team fire off shots unchallenged. This is not the New York City I know. Wh...
