

1. ? Apple Is Going to Further Tighten the Screws on Full Disk Access on MacOS, in Response to Agentic AI Apps Running Amok

Source: Daring Fireball | Published: 2026-10-02T20:40:15Z

Link: https://daringfireball.net/2026/10/apple_full_disk_access

Hopefully Apple has in mind a solution to this situation that will still enable knowledgeable power users to confirm agreement to a sufficiently scary warning and put their Macs in a state similar to what we have today. I worry.

2. Muse, Instagram, and VLC Lookalike Rip-Offs in the Mac App Store

Source: Daring Fireball | Published: 2026-09-28T19:50:19Z

Link: <https://lapcatsoftware.com/articles/2026/9/8.html>

Jeff Johnson: In other words, Muse AI is a blatant copy of Muse from Meta, the latter of which is currently the #1 iOS App Store download in the United States. I don't know where Muse AI ranks in the iOS App Store, but I do know that it's currently the #20 Mac App Store download in the US. It wasn't languishing in obscurity ? it had risen to #20 in the Mac App Store. A lot of Mac users are very confused when they're told that Mac apps are available but they're not in the Mac App Store , so it's a ripe opportunity for scammers. In the same post Johnson also documents an app named ? App for Instagram " ? and another named ? Video Player for VLC ?, both of which use rip-off icons in addition to their rip-off names. ?Muse AI? is now gone, but ?App for Instagram ? and ?Video Player for VLC? are both still there. I do wonder what the guy who made Muse AI was thinking. How long did he think he was going to get away with this? ?

3. ? Spitballing Predictions for Apple's October

Source: Daring Fireball | Published: 2026-09-28T18:43:48Z

Apple, in my experience, sticks to a very predictable schedule for review units.

4. Superpersuasion will look like bribery

Source: seangoedecke.com RSS feed | Published: Sat, 03 Oct 2026 00:00:00 GMT

Link: <https://seangoedecke.com/superpersuasion-will-look-like-bribery/>

The idea of ?superpersuasion? has been floating around the AI safety community for decades. Now that powerful and difficult-to-control LLMs have appeared, people are again talking about the idea that a sufficiently intelligent AI might be able to persuade people to do whatever it wants. The classic 1 version of this idea is an AI persuading some engineer to ?let it out of the box?: to grant it access to the internet. The modern version of this idea is the ?killswitch? , where if some AI ever does go rogue, the humans in control of its hardware will simply turn it off. Could an AI somehow persuade these humans to not hit the switch? When AI safety people talk about superpersuasion, they often talk about it like rationalist nerds. These people spend their lives trying to follow the most convincing arguments and calibrate their positions as closely towards the truth as possible. In philosophy terms, these are ?bullet-biters?: people who are ready to accept a ridiculous-sounding conclusion if there's a compelling argument for it. Their model of superpersuasion is an AI able to deploy a series of genuinely 2 airtight arguments against humans who are compelled to accept them. Most peopl...

5. Gadget Review: Una Watch ??????

Source: Terence Eden's Blog | Published: Fri, 02 Oct 2026 11:34:48 +0000

Link: <https://shkspr.mobi/blog/2026/10/gadget-review-una-watch/>

I've never been a huge fan of smart watches. My £16 smartwatch is basically fine, but the OS is closed source and there's no way to add new functionality. Previously I had the eInk Watchy which was a pain to use and really poorly designed. Even back in 2014 I was bemoaning the design compromises in the MyKronoz ZeWatch Smart Watch. So why did I pick up the Una Watch? Firstly, the Una Watch is ?

6. The Brain Sandwich

Source: Terrible Software | Published: Fri, 02 Oct 2026 14:00:14 +0000

Link: <https://terriblesoftware.org/2026/10/02/the-brain-sandwich/>

The brain sandwich is a practical AI coding workflow: understand the problem, let an agent help, then verify and explain its work before sharing it.

7. Premium: How Has AI Changed The Economy?

Source: Ed Zitron's Where's Your Ed At | Published: Fri, 02 Oct 2026 18:46:35 GMT

Link: <https://www.wheresyoured.at/premium-how-has-ai-changed-the-economy/>

This week, the Wall Street Journal ran an alarming illustration of AI's potential share of GDP that I'd argue did more to muddy the waters than actually telling anyone anything, mostly because its measurement, for whatever reason, covered 2025 to 2032, meaning that six out of

8. Altera Quartus Linux jtagd bug fixes

Source: Downtown Doug Brown | Published: Sat, 03 Oct 2026 05:50:45 +0000

Link: <https://www.downtowndougbrown.com/2026/10/altera-quartus-linux-jtagd-bug-fixes/>

I went kind of overboard looking into issues with Altera USB Blaster clones a couple of years ago. While writing that post, I ran into some really frustrating intermittent problems in Linux with jtagd that I was never able to figure out: I also experienced a really weird unrelated problem in Quartus Programmer 18.1 in [?]

9. Make tmux the OS

I recently watched the talk by Scott Jenson titled "Are we really going to use the same Desktop UX forever?" <https://www.youtube.com/watch?v=V7AfAcQwLW0&t=445s> . He's a great presenter, really articulate and concise. The kind of speaker that you'd

10. Digitale autonomie in het kort bij KIVI, STT en NAE

Source: Bert Hubert's writings | Published: Fri, 02 Oct 2026 11:30:00 +0200

Link: <https://berthub.eu/articles/posts/praatje-kivi-stt-nae/>

Onlangs sprak ik op een bijeenkomst van het Koninklijk Instituut Van Ingenieurs (KIVI), Stichting Toekomstbeeld der Techniek (STT) en Netherlands Academy of Engineering (NAE) over digitale autonomie. Een mooi publiek van grotendeels technisch/wetenschappelijk opgeleide mensen. Er waren (naast mij) veel inspirerende sprekers & daardoor was er een goede discussie. Ook de pers had er aandacht voor. Door mij (niet AI!) ingesproken audio versie van deze pagina: Aan het einde van de dag concludeerden we dat als er betere beslissingen genomen moeten worden in Den Haag en Brussel we verder moeten gaan dan onze rol als experts die, af en toe, als het zo uitkomt, geconsulteerd worden.
